

End of Course Project Self Appraisal

Name: Kang Xingyao	Matriculation no.: G2604349F
Section: C	Project: HR Ask Policy Assistant

1 Rate against the four criteria

Criterion	Weight	Excellent (4)	Proficient (3)	Developing (2)	Limited (1)
Conceptual understanding	25%	☒	☐	☐	☐
Technical execution	30%	☒	☐	☐	☐
Reasoning and justification	25%	☐	☒	☐	☐
Communication and clarity	20%	☒	☐	☐	☐

2 Reasoning and justification

I chose a retrieval first design with local validation rather than allowing an LLM to submit HR requests. This reduces automation and first turn completion remains 5/8, but the policy evidence is inspectable and missing fields stay null. The observed model inference cost is USD 0.000144 per query; it does not include human fallback or quarterly rule maintenance. With more time, I would add guided multi turn collection and obtain independent HR review of a locked policy snapshot.

3 Headline evidence and limitation

The draft schema passed 8/8 ticket cases; the retrospective AI assisted answer review passed 22/25 and my documented manual student spot check passed 8/10. The engineering regression suite passed 15/15 checks. These measures are separate: valid JSON and citation IDs do not prove policy correctness. The manual check is not independent HR validation, informal wording remains a weakness, and I would not claim production reliability from these development results.

4 AI assistance and declaration

AI assistance supported implementation, synthetic teaching data, test scaffolding, analysis and presentation materials. It also required verification: I checked saved evidence, removed unsupported claims and recorded limitations such as incomplete first turn drafts and the lack of independent HR validation. I reviewed the submitted code, results and report, and I remain responsible for the claims in this submission.

☒ I can explain every block of code I submit what it does and why it is there.

☒ The reported metrics and costs are based on saved runs and checks I reviewed, not figures invented by an AI assistant.

☒ This is my own individual work, and I have disclosed sources, tools and assistance accurately.
